

The Great Math Race

Once upon a time, there was a big race happening at the Math Race Track. Timmy the Turtle, Sally the Snail, and Benny the Bunny were getting ready to race. They all wore their colorful racing helmets and suits. The race was about to begin!

"Ready, set, go!" shouted the race announcer. Timmy the Turtle zoomed ahead, his little legs moving as fast as they could. Sally the Snail was right behind him, her slimy trail glimmering in the sun. Benny the Bunny hopped along, trying his best to catch up.

As they raced, Timmy the Turtle and Sally the Snail saw a big sign with math problems. They stopped for a moment to solve them together. Timmy counted the apples, while Sally added the numbers. They were so good at math!

Benny the Bunny was determined to catch up to his friends. He hopped faster and faster, his floppy ears bouncing with each jump. Timmy and Sally saw Benny getting closer and cheered him on. They were all having so much fun!

Finally, the finish line was in sight. Timmy, Sally, and Benny raced towards it, side by side. They crossed the finish line together, holding hands and celebrating their race. They were all winners! The end.
