

"The Friendly Planets"

Once upon a time, Luna the Moon, Stella the Star, and Cosmo the Comet were floating in space. They loved exploring the galaxy and making new friends.

One day, Luna and Stella were playing together when they saw Cosmo zooming by. They called out, "Hello, Cosmo! Would you like to play with us?"

Cosmo happily joined Luna and Stella on a colorful planet. They sat together and shared a yummy space fruit. Luna said, "Sharing is fun! It makes us feel happy and connected."

As they continued their journey, Luna, Stella, and Cosmo spotted a new planet. They held hands and flew towards it. On the planet's surface, Astro the Astronaut waved at them, excited to meet new friends.

Luna, Stella, Cosmo, and Astro became the best of friends. They learned that sharing their adventures and kindness with others made the galaxy a brighter and happier place. And so, they continued exploring the universe, spreading joy wherever they went. The End
